INVESTMENT PROCESS/PORTFOLIO CONSTRUCTION

Emerald uses a ten-step research process to assist in identifying companies that qualify for inclusion in its portfolio. The process reveals competitive advantage, an assessment of management, specific growth drivers, risk, and valuation metrics (and its comparable). Emerald portfolio managers and research analysts are in constant communication and also participate in weekly structured research meetings. To control volatility, Emerald diversifies its portfolios not only between the broad economic sectors, but also among sub-groups or industries within these sectors.

PORTFOLIO GUIDELINES
